Company Overview

StackUnited is a full-service technology and design company specializing in web development, digital content storage, distribution and streaming. We are presently contracted as the development team for a rapidly growing platform in the exciting, fast paced, multi-billion-dollar adult technology industry, the StackUnited team is composed of open minded, ethical, passionate people committed to expanding the utilization of applicable technologies today, and in the future to propel the needs of business and consumers alike.

We firmly believe our success stems from the desire to empower our teammates to believe anything is possible and deliver exceptional results. As Steve Jobs once said, "...while some may see them as the crazy ones, we see genius, because the ones who are crazy enough to think that they can change the world, are the ones who do." If you are ready to join a life changing team, we are ready to hear from you!

Position Summary

If you have equal parts creative analytical thinking skills, excellent understanding of contemporary user-focused design methodologies, and project management, then you are the UI/UX Engineer we have been looking for. You will need to turn complex problems into intuitive solutions. As our UI/UX Engineer, you will bridge the gap between design and development teams to produce a beautiful and efficient user experience. You will need to be a flexible people person, able to adapt to the many changes of designing software products.

We are seeking futuristic, versatile, strategy-minded creatives with marketing experience, an understanding of the importance of consistent and effective brand messaging, and a strong work ethic. This person meets and exceeds deadlines, is able to problem solve, while working in a fast passed environment and work in harmony with others.

Responsibilities
